

## Instructions for the Mauerpark Reusable Challenge

© LIFE e.V.

Your participation in the Mauerpark Reusable Challenge saves packaging waste and thus valuable resources. It also helps to keep Mauerpark and its surroundings clean. Besides, if you use it regularly, you can win the borrowed wooden box and the reusable boxes for your company permanently! And as the top prize, a richly filled gift basket for a feel-good evening at the company awaits you.

### How does it work?

We provide your company with a wooden box of reusable containers that you can use during the promotional period from 17th January to 17th April, 2022, to save on single-use packaging. This is accompanied by a tally sheet for collecting points.

### Task 1: Food in reusable containers

#### Win: The wooden box and the containers can stay!

All participants sign the back of the enclosed tally sheet. On the front side, a tally is made for each use of a reusable container in each calendar week.

The Mauerpark Reusable Challenge is won when the team achieves an average of at least 10 points per participant!

Example: 10 employees take part in the campaign, 4 employees have collected 20 points each and 6 employees have collected 7 points each = 122 points! In total, this is more than an average of 10 points per employee (10 points x 10 employees = at least 100 points had to be collected) - the challenge is won!

### Task 2: Photos of your food

#### Win: Gift basket with goodies and surprises

Delicious food in reusable containers also looks good on great photos! That's why the company that submits most photos of food in reusable containers during the campaign period will win the top prize: a richly filled gift basket.

The photos can be uploaded on the photo upload page. If you agree to this, we will use some of the photos for public relations to make eating in reusable containers tasty for more people!

(max. 3 photos per upload possible, but number of uploads unlimited)

Das Projekt „Klimaschutz is(s)t Mehrweg“ wird vom Bundesministerium für Umwelt, Naturschutz und Reaktorsicherheit (BMU) im Rahmen der Nationalen Klimaschutzinitiative gefördert. [www.esseninmehrweg.de](http://www.esseninmehrweg.de)

## What's in the box?

We have put together a good mix of different reusable containers for you to use during your lunch break. In the following table, we present the individual containers and provide concrete practical tips.

### We recommend:

- ✓ transport filled containers in an upright position
- ✓ to clean all vessels in the dishwasher  
(all containers and lids are dishwasher safe)
- ✓ put only dry containers back into the wooden box

### Why are many things made of plastic?

- ✓ more break-proof and durable
- ✓ especially light
- ✓ heat insulating
- ✓ lower processing temperatures during production (compared to glass/porcelain)
- ✓ pollutant-free, pure plastic is 100% recyclable

### Questions? tips? You need other vessels?
